INTERIOR DESIGN TRENDS FEATURED AT SALONE DEL MOBILE 2023

Bold colors and patterns

In recent years, minimalism has been the dominant trend in interior design, with clean lines and neutral colors being popular choices. However, in 2023, designers featured at the Salone del Mobile are revealing a shift towards maximalism, with bold colors, patterns, and textures taking center stage.

Designers are experimenting with **bright, eye-catching colors and unique patterns** to create furniture designs that stand out. This trend is a departure from the more neutral tones that have been popular in the minimalist trend of recent years and is guaranteed to add a touch of personality and originality to any space.

This trend is evidenced in many of the accessories being showcased at this year's Salone del Mobile, including brightly colored paintings, rugs, and table decorations. There are also wallpaper designs such as Y02's **Paradiso**, depicting bright geometric shapes with imagined landscapes, and **Paysage Aride**, bold and Andalusian-inspired wallpaper from the same company.
